UTTARAKHAND ELECTRICITY REGULATORY COMMISSION DEHRADUN

NOTIFICATION

December 5, 2008

No F-9/22/REG/UERC/2008/1197 -

Commission hereby makes the following Regulations, namely -

1. Short title, Commencement and Application--

1. These Regulations shall be known as the **Uttarakhand Electricity Regulations, 2008**, and shall be read with the **Uttarakhand Electricity Regulation Act, 1998**.
2. These Regulations shall come into force on the date they are put in the official gazette.
3. These Regulations extend to the whole State of Uttarakhand.
4. These Regulations will apply to HT & LT lines and all new connections and increase or decrease of loads already sanctioned.

2. Definitions--

In these Regulations unless the context otherwise requires--

1. Agreement with its grammatical variations and cognate expressions means the supply agreement entered into by the distribution licensee and the consumer in the format specified at Annexure 1.3.
2. Bank Rate means the Rate as notified by Reserve Bank of India as 4% of the RBI Act, 1934.
3. Continuous Process Industries would mean the industries requiring continuous supply due to continuous nature of their process like glass, textile, paper, industry etc. The decision on whether a process is continuous or not has to be taken based on guidelines to be prepared by distribution licensee's management which would have to be approved from the Commission before their application.

(4)^{1st} "Earthing systems" shak-

- 2003 shall have the meanings assigned to them in the said Act

Provided that applicants shall be allowed to take connection at voltage higher than voltage of supply indicated above

... independent feeder only

- 4) A connection will be given to a new consumer, with a direct phase 4 wire energy meter and specifications as provided in the ... Authority ... of Meter Regulations 2006 and the same shall be ... as per ... Regulations

... shall be less than 6 sq. m

... shall be used to ... the ... metering ... (as per ... Regulations 2006)

- 5) ... Regulations 2006 -

Accuracy Class		
Voltage of supply	Meters	CT & PT
0.23 kV	0.5	0.2
0.4 kV	0.5	0.2
11 kV	0.5	0.2

... lower accuracy class can be ...

- 6) ... and all other Rules/Regulations

When a new consumer is ... the new prospective ... has paid a ... from the ... licensee ... the receipt of such ... the date of receipt of such application. In case the distribution licensee does not ... or issue the no-dues certificate within the ... the licensee shall have to recover his dues and no dues from previous consumer as per provisions of law

- 10) Provisions of sub-regulation 9 above shall not be applicable where property has been purchased in a public auction and distribution licensee shall have to recover his outstanding dues from previous consumer as per provisions of law
- 11) Where a property has been ... the outstanding electricity dues of such ... property shall be divided on ... basis based on area of such sub-divided property
- 12) A new connection to any portion of such sub-divided premises shall be given only after the share of outstanding dues attributable to such ... premises is fully paid by the applicant. The distribution licensee shall not refuse ... on the ground that dues on the other portions of such premises have not been paid nor shall the distribution licensee demand record of ... paid bills of other portion(s) from such applicant

3. In case of temporary suspension of supply, consumer shall have to apply for suspension of the existing connection and agreement. Consumer shall also indicate the period of such suspension. Consumer shall also apply for temporary connection in the instructions posted.

Existing HT/EHT line shall not be removed. Disconnection licensee may use existing HT/EHT line for providing temporary connection by installing appropriate meter. For re-connection consumer shall get temporary connection disconnected and apply for reenergisation of suspended connection. Connection shall be reenergised only on payment of any outstanding dues and reconnection charges in the form of bills. The procedure shall be as per Regulation 5.5.4.10 followed.

4. Application for new HT/EHT connection--

1. Any applicant for a new HT/EHT connection shall submit the following documents self declared shall be as per the following procedure:-

2. A proper person shall submit the following documents for a new HT/EHT connection shall make an application in the form of a self-declared shall be as per the following procedure:- **Annexure 1**
3. The documents shall be submitted along with the application form as per the following procedure:-

Connection at 33 kV	Rs 10 000/-
Connection at 132 kV	Rs 25 000/-
Connection at 220 kV or above	Rs 50 000/-

4. The documents shall be submitted along with the application form as per the following procedure:-

4. The documents shall be submitted along with the application form as per the following procedure:-

(a) Proof of Ownership or Occupancy and Statutory Permissions/Registrations

The applicant shall submit the following documents along with the application form --

(i) Proof of ownership/occupancy of the premises in the form of

- a) Sale deed / lease deed with a self-declared with the month prior to the date of application. The khasra / khatauni / chakri / chakri of applicant's name in the khasra or khatauni shall be sufficient for this purpose) or

b) Registered General Power of Attorney or

- c) Municipal tax receipt / Demand note or any other related document or

d) Letter of allotment, and

Proof of making application for approval / permission / NOC of the competent authority such as Pollution Control Board / District Industries / etc. as required under any law / rule.

In case of a partnership firm, partnership deed and list of Partners along with their certified addresses

- iv) In case of a limited liability company, Memorandum of Association, Certificate of Incorporation and list of Directors along with their certified addresses

- (v) An applicant who is not an owner / occupier of the premises shall along with the documents stated above also furnish a letter of certificate from owner of the premises

revised by the Commission

5. Processing of an Application and Execution of Work by the Distribution licensee-

5.1 The applicant shall submit an application for HT/EHT works to the Distribution licensee. The Distribution licensee shall assign a competent person to inspect the works and to estimate the time for completion of the works. The Distribution licensee shall inform the applicant of the estimated time for completion of the works within 15 days of receipt of the application. The Distribution licensee shall also inform the applicant of the estimated time for completion of the works within 15 days of receipt of the application.

S/N	Description	Time in Days
(i)	11 kV works including line	
	(a) not involving independent feeder	60 days
	(b) involving independent feeder	90 days
(ii)	33 kV works including line	120 days
(iii)	132 kV and above works including line	180 days

5.2 The Distribution licensee shall also estimate the time for completion of the works for the following works:

S.No	Description	Time in Days
(i)	New 33/11 kV sub-station	180 days
(ii)	Augmentation of existing 33/11 kV sub-station	120 days
(iii)	Extension of bay at 33/11 kV sub-station	45 days
(iv)	132 kV and above sub-station	18 months
(v)	Extension of bay at 132 kV and above sub-station	90 days

4. Within 5 days of completion of the HT/EHT works, the Distribution licensee shall inform the Electrical Inspector to inspect the installation as per Rule 63(1) along with the requisite inspection fee. The Electrical Inspector shall inspect the works and enter his approval for energisation of distribution licensee's works to intimate the deficiencies, if any, within fifteen days from date of deposit of inspection fee by distribution licensee.

5. Applicant shall also complete installation of its HT/EHT works as per the Rules. On completion of this works, applicant shall request Electrical Inspector for approval in prescribed form as per the Rule 63(2) along with requisite inspection fee. Electrical Inspector shall inspect the applicant's works as early as possible but not later than fifteen days from date of application for inspection. Upon receipt of approval from Electrical Inspector, applicant shall inform the Distribution licensee about completion of this works and work completion report as per Annexure 1.1 along with serialised copy of Electrical Inspector's approval at least two weeks before the time-frame specified in these Regulations or tentative date indicated by applicant in his application, whichever is later.

Provided that if applicant feels that he would not be able to take supply by the date of energisation initially indicated in his application as per regulation 4.4(c) above, he may inform at least two months in advance of this date in writing to the Distribution licensee a new date in which he proposes to take the supply which shall now be deemed as tentative date indicated by the applicant. However, this option to extend the date of energisation as above may be exercised only once by the applicant.

Contracted Load-

[illegible]

(Distribution licensee shall update the list of defaulters every month)

penalty accrued on account of such defaults

by distribution licensee etc

11. Savings—

Nothing is less free than the press, and, especially for the press, the law will only make it less so. It is a principle of the press, which is the right of the press, and the Commission has, does not believe that the press is a right of the press, and it is a right of the press.

(2) **Powers to Remove Difficulties :**

any difficulty arises in carrying effect to the Commission may in its own motion or otherwise by an order of the court cause one or more of the above to be affected by such a change such as to cause the Commission to be bound to do as may appear to be necessary for removing the difficulty.

(3) Powers to Relax :

The Commission, for reasons not recorded, decided not to relax or vary any of the provisions of these Regulations on its own motion or on an application made before it by an interested person.

By Order of the Commission,

PANKAJ PRAKASH
Secretary,
Uttarakhand Electricity Regulatory Commission

C. ELECTRIC SUPPLY LINES SYSTEM AND APPARATUS FOR HIGH AND EXTRA HIGH VOLTAGES				

- | | | |
|----|------------|--|
| 23 | 63 (1) (a) | Has the neutral conductor of three-phase four-wire system |
| | 63 (1) | with earth at the sub-station? |
| | | and the metallic parts (not intended as conductors) of all transformers and other apparatus earthed by two separate and distinct connections with earth? |
| 25 | 64 (1) (a) | Are all conductors and apparatus inaccessible except to authorized persons and, are all operations in connection with the said apparatus and conductor carried out only by an authorized person? |
| 26 | 64 (1) (b) | Has the consumer provided a separate building or a locked weather proof and fire-proof enclosure for housing distribution licensee's high voltage apparatus and metering equipment or if impracticable, as the consumer segregated his apparatus from that of the supplier? |
| 27 | 64 (2) (a) | Are clearances as per BIS provided for safe operation & maintenance of electrical apparatus? |
| 28 | 64 (2) (b) | Have the windings of H V Motors or other apparatus, where within easy reach, been suitably protected so as to prevent danger? |
| 29 | 64 (2) (c) | Have suitable precautions been taken either by connecting with earth a point of the circuit at the lower voltage or otherwise to guard against danger by reason of the said circuit getting charged above its normal voltage by leakage from or contact with the H V Circuit |
| | 64 (2) (d) | <p>litres of oil is used in the transformers and switchgears installed in one chamber?</p> <p>Has provision been made for draining away the leaked or escaped oil used in one chamber?</p> <p>Has provision been made for extinguishing any fire?</p> <p>Has any spare oil been stored in the sub-station or switch station?</p> |
| 31 | 64 (2) (g) | Have cable trenches inside sub-stations, etc. containing cables been filled with sand and or pebbles, etc. or completely covered with non-inflammable slabs? |
| | 64 (2) (h) | Where it is not possible to disconnect the entire installation for cleaning or other purpose, have the conductors and apparatus been so arranged that they may be made dead in sections to enable the work on any dead section to be carried out by an authorized person without danger? |
| 33 | 64 (3) | Have EH V apparatus been protected against lightning as well as switching over voltages? |
| | | Has the insulation of the high voltage supply system apparatus withstood the following tests? |
| | (a) | If the normal working voltage does not exceed 1000 volts the testing voltage of 2,000 volts |
| | (b) | If normal voltage exceeds 1,000 V but does not exceed 11,000 V the testing voltage of double the normal |

1	2	3	4
		(c) If the normal working voltage exceeds 11,000 V the testing voltage of normal working voltage plus 10,000 V or 22,000 V whichever is higher	
45	65 (3)	If above tests have been carried out before installing the electric supply lines and apparatus in position have these tests also been applied after their installation or if impracticable has the insulation of the entire installation withstood a pressure of not less than 1,000 volts, applied between the conductors and also between conductors and earth for a period of not less than one minute	
46	65 (4)	Has the test prescribed above been applied to the electric supply lines or apparatus after alterations or repairs?	
47	65 (5)	Have the results of above tests been recorded?	
48	65 (6)	In case the above tests have not been carried out has a copy of the manufacturer's certified tests been supplied? Quote reference and attach a copy	
		sheathed electric supply lines?	
		(a) Have the conductors been enclosed in a metallic sheathing electrically continuous and efficiently earthed?	
		(b) In the event of failure of insulation between one conductor and metal sheathing at any point is the impedance of the circuit such that with the full voltage maintained at the source of supply the current resulting from such failure is not less than twice the value of the current for which suitable cutout of adequate rupturing capacity or a suitable overload protective device has been set to operate a suitable discriminative fault current relay?	
40	68 (1) (a) and (c)	Is the sub-station erected under ground? If so, have the controlling switch gears and cutout, etc. fixed in separate receptacle above ground?	
41	68 (1) (b)	Has an efficient fencing 1.8 metre high been provided to prevent access to electric supply lines and apparatus installed in an outdoor plinth type sub-station	
42	69	Have substantial hand rails been built around the platform provided for a person to stand on a pole type sub-station? Have the hand rails and platform if of metal been efficiently earthed?	
43	70	In case static capacitors have been installed to improve load power factor, have suitable provisions been made for immediate and automatic discharge of every static condenser on disconnection of supply?	
44		Any other remarks	

certify that all the conditions laid down by the distribution code relating to the supply of electric energy and all the requirements of the Electricity Act 2003 and Indian Electricity Rules 1956 especially Rule 51 thereof have been correctly complied with. The maximum capacity of the main fuse does not exceed _____ Amperes and no increase will be made in the load without due notification and permission in accordance with the rules/regulations in this regard.
